

ADVANCED DIVER

The PADI Adventures in Diving program offers both the Adventure Diver and Advanced Open Water Diver certifications. If you complete any three Adventure Dives, you can earn your PADI Adventure Diver certification. After completing your three Adventure Dives plus the Deep Adventure Dive and the Underwater Navigation Adventure Dive, for a total of five dives, you can earn your Advanced Open Water Diver certification.

WHY BECOME AN ADVANCED OPEN WATER DIVER?

After your five dives, you'll be more experienced, feel more comfortable in the water and simply enjoy diving more because you better understand the underwater environment. The Advanced Open Water course will also allow you to experience deeper and more exciting diving.

WHAT DO I NEED TO START?

You need a PADI Open Water Diver certification or a qualifying similar certification from another organization. The minimum age is 15 for the PADI Advanced Open Water certification or 12 to become a PADI Junior Advanced Open Water Diver.

HOW MUCH DOES IT COST?

Full Lifetime PADI Advanced Open Water SCUBA Certification is \$199.00 and includes the book or CD. Special boat, admission or other fees may apply to some of these dates. Check with our SCUBA Manager. Rental gear is usually available and specials are often available at Fontana Sports.

WHAT WILL I DO?

Advanced Open Water Certification will expand your dive abilities with hands on experience! No academic test is required for this course. Get into the water and start enjoying these exciting dives. This certification includes these Adventure Dives:

- Deep Adventure Dive
- Underwater Navigation Adventure
- Night Adventure Dive
- Search and Recovery Diver
- Underwater Naturalist

WHERE CAN I GO FROM HERE?

Emergency First Response Program (EFR) is the fastest-growing international CPR, Automatic External Defibrillator (AED) and First Aid training organization. Dedicated to training the lay rescuer, EFR courses encompass adult, child and infant CPR skills, provide AED and First Aid training, and feature an outstanding First Aid at Work component. The award-winning programs and state-of-the-art training materials make it a favorite among divers around the world.

Many divers take the Emergency First Response course to meet program prerequisites, such as PADI Rescue Diver, or as preparation for becoming a PADI Dive master. The Emergency First Response program meets requirements for CPR and First Aid in the workplace (OSHA Guideline 29 CFR 1910.151), and incorporates the latest procedures for emergency patient care.

WHAT ELSE CAN I DO?

PADI Rescue Diver is rewarding and fun – that best describes the PADI Rescue Diver course. This course will expand your knowledge and experience level. Rescue Divers learn to look beyond themselves and consider the safety and well being of fellow divers. Although this course is serious, it is an enjoyable way to build your confidence.

Pursue your PADI Dive master certification and take the first step in your dive career. Working closely with a PADI Instructor, you will expand your dive knowledge and hone your skills as you become a dive professional. PADI Dive master training develops your leadership abilities by training you to supervise dive activities and assist instructors with student divers.

The 2008 Schedule

June 28 & 29

August 2 & 3

September 6 & 7

Certification can also be done on several Tuesday night dives, during the summer (starting May 20th) or by appointment
